EMPLOYMENT HISTORY

Tribal Worldwide London

October 2015 – Present

Front-end Web Developer Contract

- Built new homepage for Volkswagen, featuring full-screen background video (going live in August)
- Built responsive Which Model Comparison microsite for Volkswagen using Backbone, jQuery, Grunt, BEM, and Sass. Allows users to add up to 3 models on the fly and compare specs
- Built Retailers microsite for Volkswagen using jQuery, Grunt, BEM, and Sass
- Built Explore page for Volkswagen using flexible and reusable components, significantly reducing development time for future projects, including retailers microsite, allowing it to launch on schedule
- Implemented reusable front-end components across Volkswagen site and kick-started changes in workflow

Saatchi & Saatchi London

September 2014 – October 2015

Front-end Web Developer

- Built LED drawing interface for Mattessons Frhank microsite, including customized pixel-drawing panel, Backbone-validated submission form and user-submitted image gallery, using Backbone, Grunt and Less
- Built interactive milk poster for Cravendale, allowing users to create cartoon avatars with customizable slogans, using Backbone, Grunt, BEM and Sass
- Built responsive, component-based brand bible for Direct Line, using Grunt, BEM and Less
- Took part in 24-hour hackathon and built a real-time, tweet-driven UK Election sentiment analysis tool, with live-updating SVG map and stats
- Advised on switch from Mercurial to Git, advised and wrote blog post on switch from Less to Sass
- Implemented front-end guidelines for Sass usage and component-based development
- Built HTML 5 adverts for Toyota using GreenSock Animation Platform
- Re-wrote HTML and CSS for Saatchi custom CMS using component-based, responsive CSS with BEM and Sass

Precedent London
Front-end Web Developer

July 2012 – September 2014

- Improved code sharing and communication across company by setting up GitHub Gists and coordinating monthly front-end catch up and knowledge-sharing sessions
- Implemented and improved front-end workflows, coding standards and toolsets company-wide, including Sass, BEM, Mixture, JSHint and bash
- Created component-based, responsive front-end for Royal Central School of Speech and Drama using BEM, Sass and Mixture
- Implemented all front-end code directly within Sitecore back-end for David Lloyd Agile project using Sublime Text and Visual Studio
 - Built AJAX club finder with geolocation and custom Google Maps using JavaScript and jQuery
 - AJAX timetables using Handlebars JS
 - Mobile-first responsive CSS using Sass/Compass
- Built FSCS Protection Checker microsite
- Built Barts NHS Trust responsive templates, for integration with Umbraco back-end
- Built Parkinson's UK templates with custom accessibility tools including navigation arrows, for integration with Drupal back-end
- Built mobile prototype for credit card application for Tesco Bank
- Interviewed candidates for front-end roles
- Gave presentation at Bexley Grammar School and helped with coding challenge as part of BIMA D-Day
